

MeterData™ Service Demo

MeterData™ is web based software that provides remote access to NoWire's meter information. This includes daily meter readings; user defined period consumption totals, and helpful diagnostic graphs. Data can be easily exported into Excel™ with one click.

To view a live demo of MeterData™:

- Website address: <http://meterdata.submetersolutions.com/login.php>
- User name: demo
- Password: demo

Home Page:

- Online Status column indicates if the property is fully online and functional.
- "Map" – Click on the pushpin in the "Map" column to view property location on the map.
- "View" – Click on magnifying lens in the "View" column to see details for each property.

View Consumption: Shows the usage readings per unit for a specific property.

- Adjustable date range for specific windows of reads.
- "Export" – creates .csv file to be used in Excel™.
